

Flip Pole Swag

9006

This pole swag has an unusual cut that allows it to flip and hang differently from ordinary pole swags. Even though it appears as if it were casually thrown over the pole, it maintains a dressy, sophisticated look. Each swag section should be dressed to hang slightly different from each other. The ends of the swags have ample gathers while the middle of the swags has less fullness. Print fabrics show off beautifully. The **swag pattern offers widths of 22" to 34"**. Because of the way it is cut, wider sizes do not work. Use as many swags as necessary. **Swag depths are 16" or 18"**. The swag has a droop area of 2" to 3" from under a 2" pole. Other poles can be used and will create a different droop size. The **jabot is about 41" deep**. The **tail can be 20" or 22" deep**. The jabot can be altered to be wider and/or any depth. A pattern for the bows is included. They are made and attached separately. The café curtain can be any length. It can be installed on a 5/8" wood pole or a curtain rod. Instructions are for finishing the top of the curtain only.

Fabric Suggestions: Stay away from bulky fabrics. Crisp fabrics can work, but soft ones are best. The swag will not hang in smooth curves even when cut on the bias. It is designed to hang with the folds holding fullness (even crinkles). The swags should be contrast lined if you want them to flip at the edge. The jabots, tails, and bows should be self or contrast lined.
