Fabric Suggestions: The **basketball and football pillows** work best with stretchable fabric. Fullness has to be added to each piece in order for it to contour to the shape of the ball. Other fabrics will give an untidy look. It is also important to use a color that will allow the seams to show. Stay away from dark colors. If you can't see the shape of the seams, it will look like just another ball. A lining will be needed for the basketball and football pillows. This lining *does not* need to be stretchable.

The Purse Pillow can handle most any fabric, even upholstery fabrics. It does not require a lining. It will have a separately stuffed pillow about 13" x 11" placed inside it. You can make this separately.

With so many different widths and repeats available today, we find it works best if we give you the actual pattern sizes so you can determine how they will fit on your fabric on your fabric.
