

Empire on a Rod 9204

This pattern was revised in 1993. If you don't have the latest pattern you may return your used pattern for a new one at ½ price. If your pattern is unused there is no charge, except shipping cost.

I need this swag to be deeper, how can I alter it?

Angles and shapes of the curves would have to change. We cannot help you with that. You need to use pattern 9229. It will do the same as 9204, but also has depths of 16", 18" or 20". It also has the option of a jabot and many size rod pockets and headers.

I have 9204 and I am not sure about the length of the jabots?

The 9204 does not have jabots. It has returns which hang about 18" at its deepest point. If you want jabots, use 9229.

I have 9204, how can I make the pocket larger?

You can't, effectively. You need pattern 9229.

Could this valance be installed on an arched curtain rod and still look good?

No, it is not shaped for an arch.

I'm getting ready to do this pattern and didn't read whether or not you would recommend interlining. I'm using a linen type fabric. My customer wants it interlined.

Interlining instructions wasn't included in that pattern, but, yes you can use interlining in it.
