

TIP OF THE MONTH DECEMBER 2005

AN EXAMPLE OF M'FAY DESIGNER'S DIGEST

Window 187

Make the swag, horn, jabots, and tiebacks according to directions in the 9256 pattern package. At the appropriate time, apply the gimp trim.

Glue or hand sew the gimp to the extreme outside edges. Use a no-fray liquid, or glue to carefully seal the end edge of the gimp, and then trim it to a gentle curve at the center of the curl. Patterns for the gimp placement are in the M'Fay Workroom Manual, Supplement 2.
