

## TIP OF THE MONTH AUGUST 2008

### PATTERN 9313

To use this valance for a board mount:

Use a straight board for mounting. Make a straight flat strip of contrast fabric (about 8" deep) to place on the front of the board. This creates a backdrop for the valance droop areas.

A ribbon "tab" could stitch into the crack of the pleat seam. Use it to secure on top of the board.
